Automatic Updates

- SpecsIntact now automatically updates:
 - UFGS Master

XML

Extensible Markup Language

Endless

Possibilities

XML

- XML is now a mainstream technology
 - Industry is rapidly adopting
 - AG, IBM, Sun, Microsoft, Netscape, DataChannel, SAP and many others have already announced support for XML
- Will provide more flexibility and benefits
- Providing a Style Sheet allows the display of well formed documents in most browsers

XML

- SpecsIntact became *fully* XML compliant in v4.2.0.785
- The new software works with both XML and older SGML formats simultaneously and transparently
- The XML format will be *incompatible* with prior SpecsIntact software versions
- The XML Guide Specifications and software was released and distributed at the same time

CSI MasterFormat™ 2004

- Software

- Supports both MasterFormat 1995 and MasterFormat 2004
- File name increased from 6 alpha/numeric characters up to 14 numeric characters
 - 00 00 00.00 00
 - First three levels are mandatory
 - Last two levels are optional
 - Will use the fifth level to indicate the agency
- Supports the new Division Numbers

CSI MasterFormat™ 2004

- Guide Specifications
 - Were converted and available by the April 2006 release
 - Guide Specifications and software were released and distributed at the same time
 - Will be maintained in MasterFormat 2004 **only**
 - Will not disassemble the Submittal Procedures Section (currently 01330 – MF 01 33 00)
 - Will not disassemble the Sources for Reference Publications (currently 01420 – MF 01 42 00)

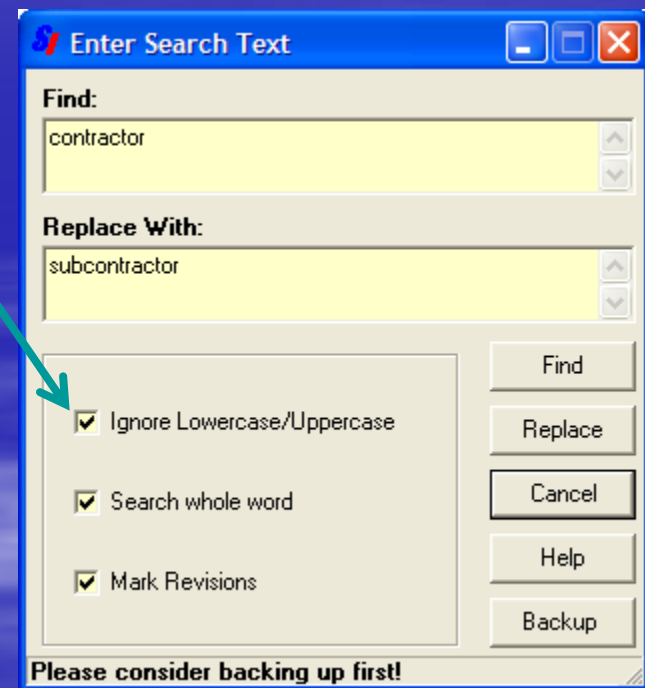

SI Explorer's Drag & Drop

- SI Explorer now provides the capability to drag & drop sections from Windows Explorer to the SI Explorer.

Global Search / Replace

- Provides capability to Search / Replace text for an entire Job.

Ignore Lowercase/
Uppercase

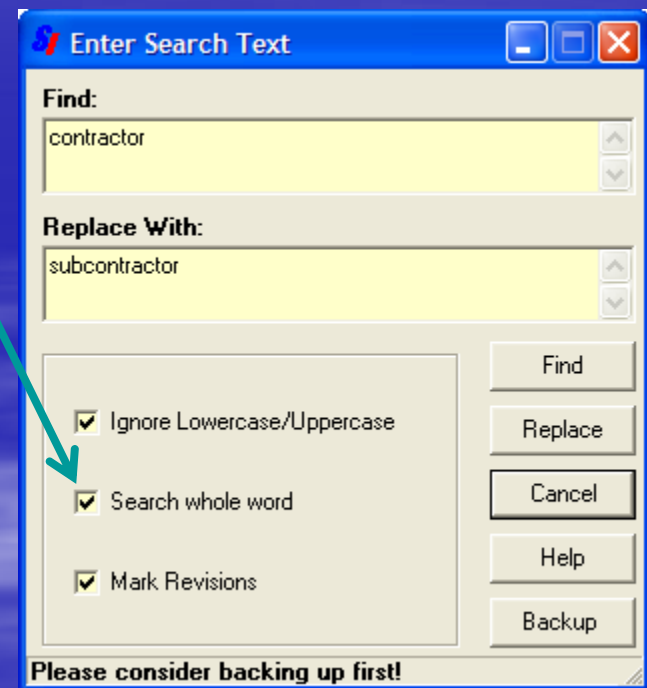

The screenshot shows a dialog box titled "Enter Search Text". It has two text input fields: "Find:" containing "contractor" and "Replace With:" containing "subcontractor". Below these fields are three checked checkboxes: "Ignore Lowercase/Uppercase", "Search whole word", and "Mark Revisions". To the right of the checkboxes are five buttons: "Find", "Replace", "Cancel", "Help", and "Backup". A green arrow points from the text "Ignore Lowercase/Uppercase" in the adjacent box to the "Ignore Lowercase/Uppercase" checkbox. At the bottom of the dialog box, a status bar reads "Please consider backing up first!".

Global Search / Replace

- Provides capability to Search / Replace text for an entire Job.

Search Whole
Word

The screenshot shows a dialog box titled "Enter Search Text". It has two text input fields: "Find:" containing "contractor" and "Replace With:" containing "subcontractor". Below these fields are three checked checkboxes: "Ignore Lowercase/Uppercase", "Search whole word", and "Mark Revisions". To the right of the checkboxes are five buttons: "Find", "Replace", "Cancel", "Help", and "Backup". A green arrow points from the "Search whole word" checkbox to the "Search Whole Word" text box on the left. At the bottom of the dialog box, there is a warning message: "Please consider backing up first!".

Find:
contractor

Replace With:
subcontractor

Global Search / Replace

- SI Creates a new **Virtual** Folder for the Found Files

These files are the **ACTUAL** Section files, do not delete them. Once you Exit SpecsIntact the folder will be removed.

Global Settings

- Allows you to store specific settings with a Job
- Units of Measure Options
 - Controls the SI Editors view options as well as the Process/Print options
- Revisions Option
 - Sets the SI Editor to automatically use and view Revisions
- CSI MasterFormat Version
 - Is defaulted to the MasterFormat Version of the Primary Master

The screenshot shows a Windows-style dialog box titled "Properties for Job: 98K04383". It has five tabs: "General", "Schedule", "Specifiers", "Options", and "Comments". The "Options" tab is active. Inside the tab, there is a section titled "Editing Options". Under this section, there are three main areas:

- Units of Measure:** Contains three radio buttons: "English" (selected), "Metric", and "Both". Below them is a checked checkbox labeled "Use this setting when printing this Job".
- Use Revisions:** A checked checkbox.
- CSI MasterFormat Version:** Contains two radio buttons: "MasterFormat 1995" and "MasterFormat 2004" (selected).

At the bottom of the dialog, there are four buttons: "Print...", "OK", "Cancel", and "Help".

Export Submittal Register

- Provides the capability to Export two file formats

Publishing to PDF and Word

- Built in Feature to Publish the Guide Specifications to PDF or Word
 - Must first select the Project Table of Contents and/or Section Table of Contents

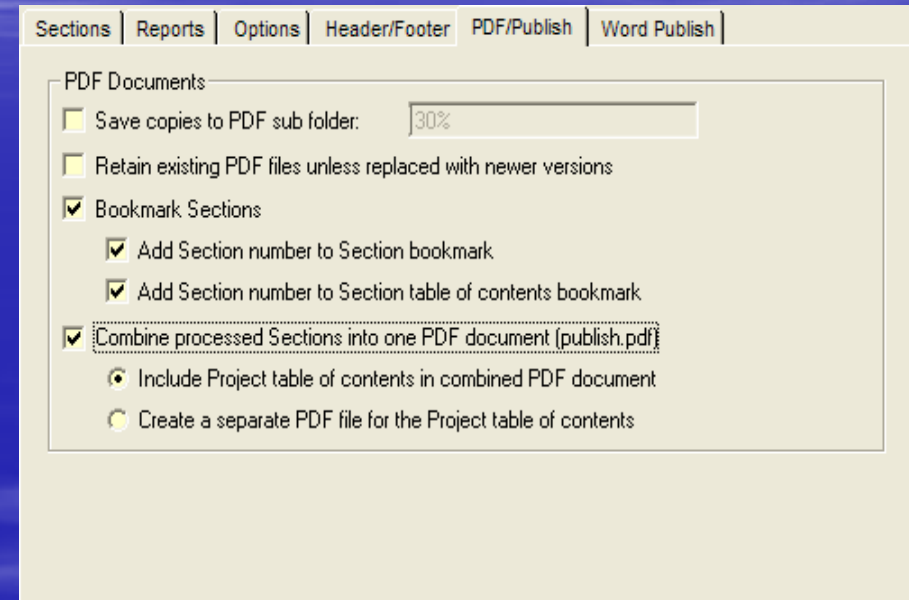

Important!

The screenshot shows a software window with a tabbed interface. The 'PDF/Publish' tab is selected. On the left, under the 'Reports' section, there is a list of reports with checkboxes: Address Verification, Reference Verification, Submittal Verification, Bracket Verification, Section Verification, Reference Location List, Submittal List, Submittal Register, and Test Requirement List. At the bottom of this list are 'Select All' and 'Unselect All' buttons. On the right, there are two sections: 'Project Table of Contents' and 'Section Table of Contents'. Each section has two checkboxes: 'Include with Scope' and 'Include without Scope'. In both sections, 'Include without Scope' is checked. There is also a checkbox for 'Include division 00 documents' under the Project Table of Contents and a checkbox for 'List any unused divisions in the project table of contents' below it. At the bottom right, there is a checkbox for 'Combine sections and section tables of contents' which is also checked. Two blue oval callouts highlight the 'Include without Scope' checkboxes for both the Project and Section Tables of Contents.

Section	Include with Scope	Include without Scope	Include division 00 documents	List any unused divisions in the project table of contents
Project Table of Contents	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Section Table of Contents	<input type="checkbox"/>	<input checked="" type="checkbox"/>
